Wheels

Par 80 & 187

WHEELING (Par. 80)

Wheels are of two kinds; on fixed or moving pivots. In all wheels, the guide on the marching flank keeps the pivot constantly in view (Paragraph 18); to this end, the Knight next to him keeps the line of his shoulders a little to the rear, but in the same direction. When platoons or larger subdivisions wheel, a slight uniform bow of the line to the rear is permissible, but any break in the line will be scored.

ADDENDUM (Par. 80)

In the execution of all wheels, **whether on fixed pivots or moving pivots, head and eyes are turned simultaneously with the first step of the wheel. Head and eyes are turned back to the front simultaneously with the first step following the completion of the wheel. When the wheel terminates with a halt, head and eyes are turned simultaneously with the last movement of the halt; that is, as the feet are brought together** (Paragraph 67).

Head Movements Following Successive Formulations into Line
(Examples: Paragraphs 205, 207, 241, 303 and 304)

In successive formations into line, **each element halts and dresses successively upon arriving in line. The Knights of each element complete the halt in unison with head and eyes straight to the front. On the first count after the halt is completed, head and eyes are turned in unison to dress.**
